

DOCTOR MURRAY CORKE

Clinical Teacher, Department of Veterinary Medicine, University of Cambridge

Murray Corke graduated as a veterinary surgeon from the Royal Veterinary College. He worked in mixed and equine practice for 6 years before joining Cambridge University Veterinary School as a farm animal and equine clinician. He currently teaches cattle and sheep medicine, consultation skills, and animal welfare. He completed a PhD with Professor Donald Broom in 2000 on the welfare of sheep with sheep scab (*Psoroptes ovis* infestation).

He is a member of the Cambridge vet school Animal Welfare Indicators (AWIN) team, working on pain associated with acute and chronic disease in sheep. Other research interests include passive transfer of immunity to neonatal ruminants, and farm animal fluid therapy.
