

DOCTOR TROY GIBSON PhD, PGDipSci, BSc

Lecturer in Animal Welfare Science, Royal Veterinary College

Troy graduated from Lincoln University (New Zealand) with a BSc in physiology in 2001. After spending two years working for a pharmaceutical company he returned to higher education and completed a PGDipSci with Distinction in animal physiology from Massey University (New Zealand).

In 2009 he obtained a PhD titled “Electroencephalographic responses of calves to the noxious sensory input of slaughter by ventral neck incision and its modulation with non-penetrative captive bolt stunning” from Massey University. In 2008 Troy joined the Royal Veterinary College as a Research Associate in Animal Welfare Physiology and in 2012 became a Lecturer in Animal Welfare Science. Troy’s areas of research include welfare of livestock during routine husbandry procedures, welfare during slaughter and wildlife management.
